

Intermediary Group - Young Cumbria Youth Group Woodhouse

Question	Agree	Response
Overview		14 young people took part in a group discussion facilitated by Connexions.
8 – Overall views on participation		We spent a good deal of our time together watching the DVD, discussing its content and in my training to get a clear picture of the concept over to them. We did spend some time on this general or overall question on which they expressed views. 9 of the group felt the search for a site should be undertaken. 5 of the group were not sure that the process should continue. The 9 in favour of proceeding wanted to do so because they saw a need to have somewhere safer to put the waste. They also welcomed the jobs they anticipated with the facility and its construction although few of them thought they could access such jobs. The 5 who were uncertain held this position because of continuing worries about safety whether based on fears of terrorism, natural disaster or accident.
